Saran Pabrikan:

- 1. Pihak pabrikan sudah tidak menyarankan untuk menggunalan Ibs fuse diatas daya travo 2000kva, fuse yang disediakan hanya sampai 100A.
- 2. Fuse yang seharusnya di gunakan untuk trafo 3000kva adalah 160A bukan 125A
- 3. Untuk trafo 3000kva disarankan menggunakan tipe VCB bukan tipe lbs fuse.
- 4. Jika terjadi fuse putus pada saat energize bukan lagi menjadi tanggung jawab vendor atau pabrikan.

Demikian penawaran harga dari kami, atas perhatiannnya kami ucapkan terima kasih.
